. ERICA database

The ERICA database is based on a reduced format which contains around 260 items. Concerning year 2019 data, around 130 items have been collected per group on average.

For example, we have used:

- › 8 items for profitability analysis
- › 13 items for financial position
- › 15 items for financial debt

The sample is representative for listed non-financial European groups. The number of groups by country depends on the way the data was obtained (**in violet**, extraction from national databases; **in mustard**, manual filling).

However, it is useful to note that IFRS are not always implemented in the same way and that groups do not communicate on the same level of detail.

Summary of content of ERICA database

General characteristics on group (ultimate parent, sector of activities, options chosen for IFRS, employees, capitalization, auditor opinion, reasons for previous year restated data, CO2 emissions) | Statement of profit and loss | Statement of comprehensive income | Statement of financial position | Statement of cash flows
