What is BACH?

BACH is a database of aggregated and harmonized accounting data of non-financial incorporated enterprises of 12 European countries, based on national accounting standards (individual annual accounts). Together with the data, yearly analyses on European companies are released through specific publications.

Who is responsible for BACH?

BACH is managed by the European Committee of Central Balance-Sheet Data Offices (ECCBSO). The ECCBSO is an informal body of experts from National Central Banks and National Statistical Institutes of Europe. Under the aegis of the ECCBSO, the BACH Working Group is responsible for maintaining and improving the BACH database.

What type of information is available in BACH?

Aggregated values: Income statement, Balance-sheet and Financial ratios

Measures: absolute values, weighted averages and quartiles

12 European countries: Austria, Belgium, Croatia, Hungary, France, Germany, Italy, Luxembourg, Poland, Portugal, Slovakia and Spain

Period: From 2000 onwards (for most countries)

Breakdowns by size classes (Small, Medium, SMEs, Large)

Breakdowns by business sectors (17 NACE sections and about 80 NACE divisions)

Complete set of methodological notes (BACH Userguide)

Countries' details and specificities

To what degree BACH data reflects the population of companies in each country? (to be continued)

In general, BACH database fairly reproduces the population of companies in each European country. Although there is some bias in coverage, the structure of samples in BACH, by business sector, reflects the population of companies in every country.
